

LEAN SIX SIGMA CERTIFICATIONS

Lean Six Sigma is a data-driven methodology that helps companies improve efficiency and customer satisfaction. Earning a Lean Six Sigma certification from the Terry College of Business sets you apart, equipping you with valuable skills in analytical problem-solving, critical thinking, and process improvement.

Terry's program combines online content, in-person instruction, and coaching, bringing together professionals from various industries committed to achieving flawless execution, continuous improvement, and peak efficiency in their organizations.

These programs are accredited by The Council for Six Sigma Certification.

WHO WILL BENEFIT

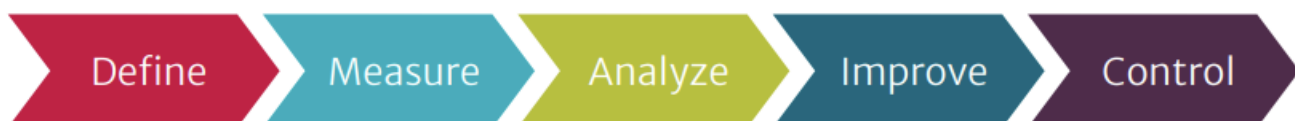

Individual contributors, analysts, supervisors, mid-level managers, project managers, leaders driving organizational change, executives overseeing improvement projects

YELLOW BELT

This self-paced online course covers Lean Six Sigma principles, quality, and the DMAIC roadmap, and includes an in-depth focus on the Define stage to explore Voice of the Customer and Project Charter.

TAKEAWAYS

- Learn Lean Six Sigma principles
- Gain understanding of the problem-solving DMAIC methodology (Define, Measure, Analyze, Improve, and Control) with an in-depth look at the Define phase
- Understand emerging trends in design thinking techniques

UNIVERSITY OF GEORGIA

EXECUTIVE EDUCATION

GREEN BELT

This program is for leaders aiming to improve processes and increase company efficiency. Participants earn a widely recognized Lean Six Sigma Green Belt certification from the University of Georgia and engage in interactive exercises, learning from both peers and expert instructors from UGA.

Yellow Belt training is included with the Green Belt program. If you have already earned a Yellow Belt through UGA Executive Education, the cost will be deducted from your registration fee.

TAKEAWAYS

- Apply the Lean Six Sigma methodology, DMAIC (Define, Measure, Analyze, Improve, Control)
- Analyze data to identify root causes
- Implement a solution and control plan to ensure the improved process is carried out consistently
- Learn to apply key elements of design thinking, change management, and project management to address select organizational challenges or opportunities

PREREQUISITES

Online Lean Six Sigma Foundations pre-work (approximately 16 hours) to include video lectures, reading, and exercises prior to the three day in-class program or independently during the online program.
